Orlando Orthopaedic Center

Tamara Ann Topoleski, M.D.

EDUCATION: Bachelor of Science degree with honors, Master of Science degree, Cornell University; Doctor of Medicine, New York Medical College; orthopaedic residency, New York Medical College; pediatric orthopaedic fellowship, Shriners Hospital for Children, Tampa. **PROFESSIONAL AFFILIATIONS:** Member of the American Academy of Orthopaedic Surgeons. **GREATEST PROFESSIONAL ACHIEVEMENT:** Nothing is more rewarding than watching patients grow, mature and heal. Pediatric orthopaedics was a natural transition for me upon completion of residency. My love and respect for children is evident in all of my activities in and out of the office and operating room. Children have much insight and information to offer; I learn from their questions daily, and I never lose sight of the fact that the child is the patient and his or her fears and concerns are my first priority. **GREATEST PERSONAL ACHIEVEMENT:** I have been fortunate and blessed in so many aspects of my life. I am grateful that I am able to share my abilities on a daily basis. **FREE ADVICE:** When choosing a physician, make sure that you have someone you feel comfortable with. Once you have made the choice, follow his or her recommendations. **WHAT SETS US APART:** At Orlando Orthopaedic Center, patients receive care and attention directly from their physician. Each doctor has

a specific patient care coordinator to whom patients may direct any questions or concerns before, during or after treatment. We have five convenient locations throughout Central Florida, ensuring a minimum of travel time. Additionally, the staff works very hard to accommodate emergency office visits so that patients can be treated and stabilized and the most appropriate subspecialist within the practice can be scheduled. At Orlando Orthopaedic Center we offer all aspects of comprehensive orthopaedic care from infancy to senior citizens, including pain management and oncology. **OUR SERVICES:** Orlando Orthopaedic Center offers numerous ancillary services in addition to physical exams and surgical care. MRI scans, prescription medications, physical therapy and pain management services are available to our patients and are supervised by the prescribing physician.
